THEXRA ENTERPRISE SOLUTIONS

SOLUTION PROPOSAL

Client: PetroNexus Energy Services

Project: PetroNexus Energy Services - Energy Solution Proposal

Date: October 9, 2026

Edit, regenerate, delete, add, or save proposal snapshots below.

1. Executive Summary

This executive proposal outlines the strategic deployment of THEXRA technologies for PetroNexus Energy Services. By digitizing Manual clipboard checklists and delayed post-shift data entry into ERP, the solution directly eliminates operational bottlenecks to deliver sustainable enterprise efficiency in the Energy sector.

2. Client Challenge

In the Energy sector, PetroNexus Energy Services faces significant operational bottlenecks characterized by "Frequent unscheduled offshore turbine downtime due to manual, error-prone paper inspection routines.". This issue stems directly from reliance on Manual clipboard checklists and delayed post-shift data entry into ERP, which severely hampers throughput and

3. Project Objectives

Transition PetroNexus Energy Services away from Manual clipboard checklists and delayed post-shift data entry into ERP by deploying an enterprise spatial ecosystem, specifically targeted to achieve "Reduce turbine downtime by 30% and eliminate paper inspection log errors completely." for Offshore field technicians (251-1000) within a 6-12-months timeline.

4. Proposed Solution

Custom THEXRA AI Engine spatial framework designed specifically for PetroNexus Energy Services. It digitizes and automates Manual clipboard checklists and delayed post-shift data entry into ERP into an interactive, real-time spatial workflow that directly resolves "Frequent unscheduled offshore turbine downtime due to manual, error-prone paper inspection routines.".

5. User Experience

Intuitive spatial interface engineered specifically for Offshore field technicians (251-1000 active users), accelerating user onboarding and minimizing operational learning curves.

6. Solution Architecture

Integrated cloud-native and spatial edge framework custom-engineered for PetroNexus Energy Services.

7. Scope of Work

Turnkey delivery of customized THEXRA platform engineered to eliminate Frequent unscheduled offshore turbine downtime due to manual, error-prone paper inspection routines. for PetroNexus Energy Services.

8. Deliverables

THEXRA Spatial App Access
Admin Analytics Portal

9. Implementation Plan

Phase 1: Discovery & Architecture
Phase 2: Spatial Customization
Phase 3: Integration & Testing
Phase 4: Final Deployment

10. Timeline

6-12-months

11. Assumptions

1. Key stakeholder availability for bi-weekly milestone sign-offs.
2. Sandbox environment API credentials provided during Phase 1.

12. Optional Add-ons

1. Premium 24/7 SLA Technical Support
2. Advanced Custom Analytics Dashboard
3. On-Site Staff Training Workshops

13. Next Steps

Schedule a 30-minute technical scoping review with THEXRA architects and PetroNexus Energy Services leadership.
