Regenerate Delete

This executive proposal outlines the deployment of VR — THEXRA View (Education Edition) for STEMTech University Network to solve critical operational bottlenecks.

Regenerate Delete

STEMTech University Network faces critical training bottlenecks in its Education programs due to limited physical access and prohibitive capital costs for high-voltage electrical engineering lab equipment, restricting remote engineering students from gaining required hands-on experimental competencies.

Regenerate Delete

Deploy an accessible, immersive virtual laboratory solution within 1-3-months to enable 251-1000 remote engineering students to safely conduct high-voltage experiments without physical hardware dependency.

Regenerate Delete

High-level architectural concept deploying THEXRA View to deliver interactive, physics-grounded VR electrical engineering laboratories, replacing physical equipment dependencies and hazardous hands-on sessions with safe, repeatable remote simulation modules.

Regenerate Delete

Remote electrical engineering students and faculty instructors (251-1000 active users)

Regenerate Delete

VR — THEXRA View (Education Edition)

Regenerate Delete

Delivery of customized THEXRA View virtual lab platform to digitize high-voltage electrical engineering labs for STEMTech University Network.

Regenerate Delete

Eliminates physical laboratory scheduling bottlenecks, ensures 100% student safety during high-voltage procedural drills, and scales interactive practical coursework across remote cohorts within budget.
