THEXRA ENTERPRISE SOLUTIONS

SOLUTION PROPOSAL

Client: STEMTech University N... **Project:** STEMTech University Network Education Solution Pr...

Date: October 13, 20...

1. Executive Summary

This executive proposal outlines the deployment of VR — THEXRA View (Education Edition) for STEMTech University Network to solve critical operational bottlenecks.

2. Client Challenge

STEMTech University Network faces operational limitations stemming from severe physical capacity bottlenecks and inherent safety risks associated with high-voltage electrical equipment. Restricting remote and distributed engineering cohorts to brief, two-hour physical laboratory rotations limits practical curriculum completion, restricts student skill acquisition, and caps overall academic throughput.

3. Project Objectives

Deploy an immersive virtual laboratory environment enabling 251-1000 undergraduate engineering students to double practical lab completion throughput and achieve a 95% satisfaction score within a 2-month delivery window.

4. Proposed Solution

A zero-risk immersive spatial lab simulation platform that replaces constrained physical rotations with scalable virtual high-voltage apparatus, enabling remote students to practice complex electrical procedures interactively with instant telemetry feedback.

5. User Experience

Intuitive spatial interface engineered specifically for Undergraduate Engineering Students (251-1000 active users), accelerating user onboarding and minimizing operational learning curves.

6. Solution Architecture

Cloud-hosted spatial engineering laboratory integrating standalone 6DoF VR environments with institutional Learning Management Systems for real-time procedural tracking and automated skill assessment.

7. Scope of Work

Turnkey engineering deployment, integration, and validation of the customized THEXRA spatial platform for STEMTech University Network.

8. Deliverables

Production-ready VR Simulation Build
LMS Gradebook Integration Adapter
Instructor Analytics Dashboard

9. Implementation Plan

Phase 1: Discovery & Architecture
Phase 2: Spatial Customization
Phase 3: Integration & Testing
Phase 4: Final Deployment

10. Timeline

1-3-months

11. Assumptions

1. Key stakeholder availability for bi-weekly milestone sign-offs.
2. Sandbox environment API credentials provided during Phase 1.

12. Optional Add-ons

1. Premium 24/7 SLA Technical Support
2. Advanced Custom Analytics Dashboard
3. On-Site Staff Training Workshops
