SCOPE OF WORK (SOW)

1. PROJECT SCOPE

Delivery of customized THEXRA platform to virtualize spinal fusion training and replace cadaver workflows for ApexHealth Surgical Innovations.

2. CORE FEATURES
- High-precision spinal anatomy manipulation
- Objective resident accuracy scoring and real-time error alerts

3. DELIVERABLES
- Enterprise VR surgical simulation build
- Instructor oversight telemetry dashboard

4. HARDWARE REQUIREMENTS
- Client-supplied enterprise VR headsets

5. SOFTWARE MODULES
- THEXRA Enterprise License

6. CONTENT ASSETS
- Customized Spinal Fusion 3D Anatomical and Surgical Tool Asset Pack

7. TRAINING PLAN
1-Day Operational Workshop for Surgical Instructors and Residency Directors

8. DEPLOYMENT STRATEGY
Managed Cloud Release with MDM Headset Provisioning

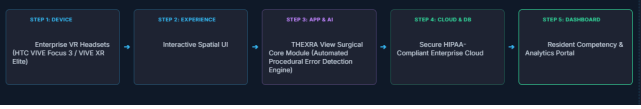

9. ONGOING SUPPORT
Dedicated SLA Technical Support

10. EXCLUSIONS (OUT OF SCOPE)
- Physical surgical mannequin hardware maintenance
- Custom hardware modifications outside supported enterprise VR headsets

4. TECHNOLOGY SELECTION

VR — THEXRA View (Healthcare Edition)

AUTOMATED SYSTEM FLOW DIAGRAM:

1. Overview: High-fidelity immersive VR surgical simulation framework built on spatial physics and clinical telemetry.

2. User Journey: Resident surgeon authenticates → Calibrates VR headset environment → Executes digitized spinal fusion procedure → Syncs real-time surgical telemetry and receives objective feedback.

3. HARDWARE

Enterprise VR Headsets (HTC VIVE Focus 3 / VIVE XR Elite)

4. SOFTWARE

THEXRA View Surgical Core Module, Spinal Fusion Simulation Engine

5. AI COMPONENTS

Automated Procedural Error Detection Engine

6. XR COMPONENTS

Interactive Spatial UI, Sub-millimeter 3D Surgical Tool Manipulation

7. BACKEND

Secure HIPAA-Compliant Enterprise Cloud

8. DASHBOARD

Resident Competency & Analytics Portal

9. DATA FLOW

VR Headset → Edge Simulation Runtime → Cloud Telemetry API → Analytics Portal

5. EXPECTED BUSINESS OUTCOMES

Substantial reduction in annual cadaver procurement expenses, elimination of patient risk during resident learning curves, and standardized surgical proficiency benchmarking.

6. RECOMMENDED NEXT STEP

Schedule a 30-minute technical scoping review for ApexHealth Surgical Innovations.
